Parish Council News

Broadband. Many people are still unaware that Superfast Fibre Broadband is now available in Hayton. To confirm this Google: Openreach Check Fibre. Put in your telephone number. You will get confirmation of availability and instructions on how to apply.

Your Community, Your Plan

Neighbourhood Development Plan. The Parish Council has started the process of preparing a NDP. This will help to develop a vision of our community formulated by you, the residents of the Parish. The NDP will give the PC a STATUTORY right to decide on the scale, type and nature of development taking place in our community. At present we can only advise and comment.

We want this Plan to be based on a shared vision of what we want our communities to look like in twenty years time, in terms of housing, green spaces, community facilities etc. Engaging with the local community is essential to the process of formulating a NDP, as everyone can use their local knowledge of local issues to help form the Plan. At some time during the next few months everyone in the Parish will be contacted, have the process explained to them and be asked to complete a questionnaire expressing their views.

At present we are assembling a Steering Group to prepare the paperwork and liaise with residents to give them the information they will need to complete the questionnaire. We need volunteers to serve on this Group.

Would YOU like to play a major part in shaping the future of our neighbourhood? If so, please contact Mick Bettison on 01759 302359 or e-mail: fourwayshayton@hotmail.co.uk

Emergency Response Vehicles

You're probably aware that changes are being planned to Ambulance services nationwide. This is still the subject of consultation in the ERYC area but, at present, it is possible that the only Emergency Response Vehicle available in this area could be based at Langlands Garden Centre. The next nearest will be in York. We will keep people informed when changes are finalised. Cheers

Mick Bettison.
